2. The pre-approved list of carbon crediting programmes and methodologies may be updated by the Joint Committee as necessary from time to time, in accordance with the process set out in Article 5(2).

3. Notwithstanding that pre-approval has been granted to the methodologies listed above, the Parties will assess the applicability of these methodologies against its applicable domestic laws, regulations and administrative framework, in accordance with the process set out in Stage A (Submission and processing of project application to the Joint Committee) of **Annex B**.

4. If a methodology listed in this Annex has been suspended or formally placed under review by the relevant carbon crediting programme at the time the project applicant submits the application for authorisation of a mitigation activity, either Party may regard that methodology as being ineligible to qualify as a pre-approved methodology under this Annex and thus refuse to authorise a mitigation activity on that basis.

5. If the project applicant is not using the latest version of a methodology listed in this Annex at the time the project applicant submits the application for authorisation of a mitigation activity, either Party may regard that methodology used as being ineligible to qualify as a pre-approved methodology under this Annex and thus refuse to authorise a mitigation activity on that basis.
